

**PREPARATION FOR NEXT YEAR STARTS AT HARVEST**

Traditional corn heads have gaps in the deck plates and gathering chains that result in corn kernels falling right through. **360 YIELD SAVER**<sup>®</sup> eliminates those gaps by adding intermeshing bristles to traditional gathering chains to capture significantly more kernels.

Fast residue breakdown boosts nutrient availability for next spring's crop. **360 CHAINROLL**<sup>®</sup> chops and crimps stalks, making residue more available to microbial breakdown for better soil health and nutrient availability.

Surprisingly, your ripper is likely leaving 40% of the subsoil undisturbed. **360 BULLET**<sup>®</sup> lifts and fractures the soil across the total profile, eliminating these berms to increase the roots' access to soil nutrients.

**We can find out more together.**
